Introduction 1

Part I The Concept of Sustainability

Chapter 1 Un-sustainable development: an ill-posed question
or well-defined problem 7
 1.1 The industrial development pattern for the modernisation ...7
 1.2 Negative impacts of the industrial development 11
 1.3 A contemporary case of China’s industrial modernisation ...22
 1.4 A well-defined problem: the industrial development
 pattern is unsustainable 26
 1.5 Global campaign for sustainable development 27
 1.6 An integrated proposition of sustainable development34

Chapter 2 Sustainable design in the built environment..... 39
 2.1 Critical discourses on modernism design in the
 Industrial Age..... 40
 2.2 A new worldview of the Post-Modernism:
 from simplicity to complexity 54
 2.3 Contemporary campaign for sustainable design 60
 2.4 A paradigm of nature for sustainable design..... 70
 2.5 Ecological design for sustainable environment..... 78

Part II The Framework of Open Systems Evolution

<i>Chapter 3</i>	The model of open systems evolution	103
3.1	The Second Law of Thermodynamics	104
3.2	The concept of entropy	119
3.3	Universal generality of open systems evolution	140
3.4	Complexity of open systems evolution	154
3.5	Comparison of open systems evolution and Darwinism evolution.....	160
3.6	Implication: a Post-Modernism world-view and a Post-Industrial pattern	165

Part III The Application of Open Systems Evolution to Sustainability

<i>Chapter 4</i>	An intelligent model for sustainable design in open systems evolution	171
4.1	A scientific framework for sustainable design.....	172
4.2	Intelligent design in the model open systems evolution ...	173
4.3	Conceptual configuration of intelligent sustainable design	175
4.4	Parametric design of intelligent sustainable design	186
4.5	Implications of open systems evolution in sustainable design	190
4.6	Conclusion	193
Glossary		197
Bibliography		205
Index		219
Appendix. An Alternative Diagram of Transitional Phases of Open Systems Evolution		221
