

Christiane Schöneberger

## Grammar Growth in Child Second Language German

Investigating DP Development  
in an Immersion Setting

PETER LANG  
EDITION

# Table of Contents

|       |                                                                                         |     |
|-------|-----------------------------------------------------------------------------------------|-----|
| 1     | Introduction .....                                                                      | 1   |
| 1.1   | Motivation for the study .....                                                          | 2   |
| 1.2   | Aims of the study .....                                                                 | 3   |
| 1.3   | Theoretical framework and outline of the study .....                                    | 4   |
| 2     | Functional features in language acquisition:<br>The state of the art.....               | 9   |
| 2.1   | Introduction .....                                                                      | 9   |
| 2.2   | Theory development in language acquisition .....                                        | 11  |
| 2.2.1 | Where language acquisition starts .....                                                 | 13  |
| 2.2.2 | How language acquisition develops.....                                                  | 15  |
| 2.2.3 | Types of language acquisition .....                                                     | 17  |
| 2.2.4 | Functional features in L2 acquisition:<br>morphological variability in L2 grammar ..... | 18  |
| 2.2.5 | Second language acquisition: variables and contexts .....                               | 30  |
| 2.3   | Articles in first and second language acquisition.....                                  | 47  |
| 2.3.1 | Articles in German and English: a contrastive analysis .....                            | 48  |
| 2.3.2 | First language acquisition of the nominal<br>system in German and English.....          | 65  |
| 2.3.3 | Second language acquisition of the<br>German nominal system .....                       | 72  |
| 2.4   | Summary .....                                                                           | 76  |
| 3     | Empirical evidence .....                                                                | 81  |
| 3.1   | Introduction .....                                                                      | 81  |
| 3.2   | Research questions and hypotheses .....                                                 | 82  |
| 3.2.1 | The development of nominal accuracy<br>in child L2 German .....                         | 83  |
| 3.2.2 | The role of transfer.....                                                               | 88  |
| 3.2.3 | Task effects.....                                                                       | 92  |
| 3.3   | Methodology .....                                                                       | 94  |
| 3.3.1 | Immersion education .....                                                               | 94  |
| 3.3.2 | Data collection .....                                                                   | 95  |
| 3.3.3 | Data analysis .....                                                                     | 111 |
| 3.4   | Summary .....                                                                           | 120 |

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| 4 Findings.....                                                                       | 123 |
| 4.1 Introduction .....                                                                | 123 |
| 4.2 Results.....                                                                      | 123 |
| 4.2.1 Measuring proficiency: SOPA results.....                                        | 124 |
| 4.2.2 Describing development: analyzing spontaneous<br>production data.....           | 129 |
| 4.2.3 Investigating the development of nominal<br>accuracy in child L2 German.....    | 133 |
| 4.2.4 Investigating the role of L1 transfer in the<br>acquisition of L2 grammar ..... | 164 |
| 4.2.5 Investigating task effects in L2 production .....                               | 167 |
| 4.3 Revisiting the research questions and hypotheses .....                            | 172 |
| 4.4 Summary .....                                                                     | 174 |
| 5 Discussion.....                                                                     | 177 |
| 5.1 Introduction .....                                                                | 177 |
| 5.2 Contributing to theory development in L2A research .....                          | 177 |
| 5.3 The German determiner system in second<br>language acquisition .....              | 181 |
| 5.3.1 Explaining morphological variability in L2A.....                                | 183 |
| 5.4 Quality management in language learning.....                                      | 190 |
| 5.4.1 Input modifications .....                                                       | 194 |
| 5.4.2 Task design, attention to speech and focus on form.....                         | 197 |
| 5.5 Outlook and research desiderates .....                                            | 200 |
| 5.6 Summary .....                                                                     | 202 |
| 6 Conclusion.....                                                                     | 205 |
| 7 References.....                                                                     | 209 |
| 8 Appendix .....                                                                      | 229 |
| 8.1 German gender paradigms.....                                                      | 229 |
| 8.2 Experiments and testing materials .....                                           | 230 |
| 8.3 Results and statistics.....                                                       | 244 |
