

Table of Contents

Table of Contents.....	i
1. Introduction.....	1
1.1 Motivation	1
1.2 Research methodology and thesis structure	2
2. Fundamentals	5
2.1 Wireless IIoT sensors	5
2.1.1 Industrial digitalization and its application profiles	5
2.1.2 Components of wireless IIoT sensors	8
2.1.3 Power supply and need for wireless IIoT sensors	14
2.2 Energy harvesting (EH) systems.....	17
2.2.1 Energy harvesting principles	18
2.2.2 Energy management considerations.....	23
3. Multi-source energy harvesting (MSEH)	25
3.1 Existing MSEH boards	25
3.2 Industrial usage of MSEH	31
3.3 Identification of current gaps	33
3.4 Objective and research question.....	34
4. Application context and requirements	35
4.1 Design implication for flexible MSEH board development	37
4.2 Environmental and process implications for EH in industry	39
4.2.1 EH sources in industrial environments	39
4.2.2 Process conditions of the energy harvesters.....	44
4.2.3 Guidelines for the implementation of EH in industry.....	51
5. Prototype MSEH board - InduFlex	57
5.1 Concept	57
5.2 Proof of concept (PoC)	58
5.2.1 Measurement setup	58
5.2.2 Test scenarios and PoC results	59
5.3 Prototype	64
5.3.1 Schematics.....	64
5.3.2 PCB layout	65
5.3.3 Manufacture.....	66
6. Validation of the InduFlex board.....	69
6.1 Validation method	69
6.2 Validation system.....	70
6.3 Characterization of the InduFlex board	73
6.3.1 Efficiency measurements.....	73
6.3.2 System context – ambient sources	76

6.3.3 Interim conclusion..... 87

6.4 Application of InduFlex in industrial use-cases..... 88

6.4.1 Milling processes 88

6.4.2 Sheet metal processing with presses..... 97

6.4.3 Environmental monitoring 106

7. Summary and outlook 113

7.1 Summary and discussion 113

7.2 Conclusion and outlook..... 115

8. References 117

9. Student theses 127

I. Formula symbols and abbreviations cxxix

II. List of figures cxxxiii

III. List of tables..... cxxxvii

IV. Annex cxxxix
