Contents

Preface
Philip Mavberg, Dr. & Domenico Fontana 4

History and Methods of Plasmapheresis
Rolf Bambauer, Priv. Doz. Dr. 6

New Advances in Double Filtration Plasmapheresis (DFPP)
Stefan R. Bornstein, Prof. Dr. 22

Blood Purification Devices: The Unique Positioning of Inuspheresis®
Olivier Favre 38

Successful Treatment of Chronic Infections and Their Consequences
Ralf Oettmeier, Dr. 52

The Gut, Inflammation, and Neurotransmitters in Post-Infectious Conditions
Katharina Kurz, Priv. Doz. Dr. 68

Fibrinaloid Microclot Complexes as Markers for Chronic Inflammatory Diseases
Sylvia Pietzsch, MSc 82

An Innovative Tool in Environmental Medicine for Assessing the Individual Exposome
Vincent Peynet, PhD 92

Fever-Range Whole-Body Hyperthermia (FR WBH) and Its Role in the Treatment of Post-Infectious Syndromes
Stefan Heckel-Reusser 104

Aging and Disease – The Role of Blood
Ludwig Aigner, Prof. Dr. 116

Therapeutic Application of Plasmapheresis and Double Filtration Plasmapheresis in Unconventional Patients: They May Have Paws and a Tail, but Their Immune System Functions the Same
Alessio Vigani, Prof. Dr. 128

Experiences with Therapeutic Apheresis: Innovations and the Development of a Bioreactor for L-Tryptophan Depletion in Oncology
Rolf Bambauer, Priv. Doz. Dr. 140
